- Took organic traffic past 500,000 visitors a month by combining keyword research, going deeper on topics than competitors did, and earning links from high-authority sites in some very competitive niches.
- Ran international B2B SEO for a hospitality design firm whose clients include Accor, Radisson, and Kempinski, building organic visibility for procurement-related searches in South Africa, Dubai, and Asia.
- Set up e-commerce SEO from scratch for an FMCG import/export company and a luxury skincare brand expanding into South Africa and Dubai: product and category page optimization, keyword mapping, and the sites' content structure.
